ABOUT ME

Third-year undergraduate at the University of Kelaniya following BICT(Hons), specializing in the Networking Technology, with a strong foundation in modern DevOps methodologies and full-stack development. Experienced in delivering real-world software products using technologies like Django, Next.js, PHP, PostgreSQL, Docker, Kubernetes, Terraform and cloud technologies. Committed to building highly reliable, scalable systems by bridging the gap between robust network infrastructure and containerized application design. Currently seeking a DevOps Internship to leverage my industry experience.

EDUCATION

University of Kelaniya - Faculty of Computing and Technology

Kelaniya, Sri Lanka

- Bachelor of Information Communication Technology

2023-2027

Bandaranayake College

Gampaha, Sri Lanka

- GCE A/L 2022 (First attempt) - Technology Stream - 2As 1B (BST, SFT, ICT)

2019-2022

PROFESSIONAL TRAININGS

• Linux Systems Administration & Devops Engineering 2025 WSO2

May 2025 - December 2025

Six-month training program by WSO2 focusing on Linux administration and DevOps Engineering practices, Docker, Kubernetes, Terraform, OpenSearch and more, Where I lead the final project.

• KodeKloud Devops Practices

August 2025 - Present

I have completed Level 1 ([Linux](#) / [Git](#) / [Kubernetes](#) / [Docker](#)) Labs and Ongoing 100 day Devops Labs / AWS & Azure hands-on labs.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, PHP, Javascript
- **Devops & Infra:** GitHub, GitHub Actions, Docker, Linux, Ubuntu, Kubernetes, ArgoCD, Prometheus, Grafana, Wazuh, OpenSearch, Fluentbit, Nginx, Dokploy, CI/CD
- **Cloud Services & Platforms:** AWS, Azure, GCP
- **Web & Mobile Development:** NextJs, Django, Fast API
- **Networking:** Wireshark, Kleopatra, Cisco Packet Tracer
- **Database:** MySQL, PostgreSQL, SQLite
- **Data Science & ML:** Numpy, Pandas, Google Colab
- **Tools:** Figma, Postman, Swagger, Canva, Shadcnui, Jira

KEY PROJECTS

- **Salon Aurora | Wso2 Linux Systems Administration and DevOps Engineering Final Project**
Skills : Python, Fast API, Nextjs, PostgreSQL, RestAPI, Terraform, AWS, Docker, Kubernetes, OpenSearch, Fluentbit, ArgoCD, Prometheus, Grafana.

Developed highly scalable, microservices-based Salon appointment booking system (Aurora) deployed on AWS using Docker, Kubernetes, Terraform, ArgoCD, and comprehensive observability tools.

GitHub Repo: <https://github.com/WSO2-G02>

- **Rebuild Man | Donation Management System Rikili Organization (Ongoing)**
Skills : Python, Django, JavaScript, Nextjs, Docker, (K3s), Github Action, Prometheus, Grafana
 Developed and contributed to the "rebuild_man" project, a web platform designed for automated donation management system. Focused on reliability, efficiency, and enhanced operational workflows for Donators.
Github Repo: https://github.com/PrabathKuruwita/rebuild_man
- **Flavor POS | Full Stack Web Project for Centralized Restaurant System**
Skills : PHP, JavaScrips, CSS, HTML
 Flavour POS is a web-based point-of-sale application designed for efficient management of sales, inventory, and billing operations. The system provides an intuitive interface for handling transactions, managing products, and generating reports, making it ideal for restaurants
Github Repo: <https://github.com/dev-dojo-uok/flavour-pos> **Hosted Site:** <https://flavour.akaigen.online/>
- **Smart Building Management System | Second Year University Project**
Skills : Nextjs, Typescript, Javascript, Tailwind CSS, Shadcnui
 Developed frontend of a BMS system, built primarily with handle rooms in a building, It contains the Sensor measurements and realtime handling using responsive client-side User interface
Github Repo: <https://github.com/dev-dojo-uok/bms-ui>
- **Stock Portfolio Tracker | To track and analyze realtime stocks**
Skills : Python, Streamlit, NumPy, Pandas, Yahoo Finance, Docker
 Developed a Stock Portfolio Tracker and Analyzer in Python, featuring real-time stock price tracking, analysis, and advanced financial risk metrics. Delivered an interactive dashboard using Streamlit.
Github Repo: <https://github.com/WGRavinduDilhan/stock-portfolio-tracker>
- **Job Portal | User friendly Job Application System (Ongoing)**
Skills : Java, JavaScript, CSS, Docker, Github Actions, K3s, AWS, RDS(MySQL)
 Developing a job portal platform enabling graduates to apply for jobs and companies to manage the recruitments, streamlining the hiring process for both applicants and employers.
Github Repo: <https://github.com/WGRavinduDilhan/job-portal>
- **Ecommerce Platform | User Friendly Microservice Based Ecommerce Platform (Ongoing)**
Skills : React, Python, Node.js, Docker, Github Actions, Terraform, Kubernetes, GCP
 Developing a full-stack microservices e-commerce application using React, Node.js, and Python, deployed on GCP provisioned via Terraform. and Automated containerization and CI/CD using Docker, GitHub Actions, and Google Artifact Registry (GAR), securing deployments on GKE with Kubernetes.
Github Repo: <https://github.com/WGRavinduDilhan/ecommerce-platform>
- **ChatBot Service | User Friendly Simple Personal Chat Bot**
Skills : Python, JavaScript, HTML, CSS, Docker
 Developed a web-based Simple Chatbot Service with real-time communication and responses
Github Repo: <https://github.com/WGRavinduDilhan/Chatbot-Service>

CERTIFICATIONS

- **WSO2 - Linux Systems Administration and DevOps Engineering Program** Colombo, Sri Lanka
- **Multicloud Network Associate** ([Verify Credential](#))
- **Introduction to Linux (LFS101)** ([Verify Credential](#))
- **Introduction to DevOps and Site Reliability Engineering (LFS162)** ([Verify Credential](#))
- **Introduction to GitOps (LFS169)** ([Verify Credential](#))
- **Introduction to Kubernetes (LFS158)** ([Verify Credential](#))

VOLUNTEERING EXPERIENCE

- **Rikili Organization:** Volunteered as a developer and Devops practices for a real world project.
- **AIESEC Colombo North:** Manager of Business to Business, Incoming Global Volunteer Function.
- **FOSS UOK :** Member and Team leader of Opensource Summit 2026.
